# Minimizing Maintenance

## **MINIMIZING MAINTENANCE WITH MATS**

In hospitals, hotels, industrial and office suites, restaurants, theaters and educational facilities, mats should be a key element in any building maintenance program. Without them, buildings incur hundreds, even thousands, of pounds a year in excessive cleaning costs.

### **CONSIDER THESE FACTS:**

- 70-80% of dust, grime and dirt in a building is tracked in from the outside on people's feet - permanently damaging floors and carpets.
- One square meter of matting can accumulate 0.5 kilos of dirt in a week - twice that in inclement weather.
- It is estimated that the cost to remove a single pound of dirt from a building will run in excess of £600 in cleaning costs.

## **AN EFFECTIVE MAT PROGRAM IS THE ANSWER**

Mats are the most effective way of stopping dirt at the door and keeping building maintenance costs to a minimum. They are also effective in high traffic areas or at service wipe-off regions such as freight elevator lobbies, factory entrances, entrances from kitchens to restaurant dining areas, etc.

Entrance mats are the most commonly used mat products, but there are numerous other areas where mats are needed. Mats are used where safety is a must and antifatigue comfort is essential. Mats are also an excellent way to project a company image or message to employees or customers. In fact, the uses for and placement of mats are practically endless.

When planning a mat program, high traffic areas should be pinpointed and consideration given to environmental exposure. Strategic placement of mats is essential for maximum effectiveness.

Your mat can be designed to provide an important message or information for specific locations, or choose from a wide variety of stock designs to protect floors and prevent slip and fall accidents.

## Nylon Carpet Logomats

Nylon carpet custom logo mats are manufactured on a state-of-the-art digital printer. Colours are permanently dyed into the carpet and treated with our exclusive StainStopper™ technology to prevent colour loss. Choose from 30 standard colours and unlimited custom colours to create the most intricate and detailed designs in the industry.

### FEATURES AND BENEFITS

10 Business days to dispatch.

No art charges or set up fees.

Reproduction of fine details, shading and 3 dimensional images are easily achieved with our printing technology.

100% Nitrile rubber backing is chemical, grease and oil resistant.

## Outdoor Rubber Logomats

Outdoor rubber mats are made out of 100% Nitrile Rubber and are perfect for outdoor use, as well as a variety of other applications such as industrial environments. They can also be used to post safety signs and messages. These mats feature photographic quality images that have excellent colour and brightness and reproduction of fine detail. These vibrant colours will not fade when exposed to sunlight. The textured surface prevents slipping and scrapes dirt and grime off of shoes without affecting the image.

## FEATURES AND BENEFITS

Photographic quality images printed on thermoplastic material.

100% UV resistant logo will not fade or wear off when exposed to sunlight.

Textured slip resistant surface effectively removes dirt and soil

100% Nitrile rubber backing is chemical, grease and oil resistant.

Unlimited colours & graphics.
